

## THE CUSTOM MAT CO.

*Your Brand In Luxury Carpet*

# WEATHERKING CARE INSTRUCTIONS:

Your *Weatherking* mat is fabricated for heavy use with proper care. Please use this care guide as a reference to help with common wear and tear maintenance. If you are ever uncertain about the best practice to take, please do not hesitate to call us. (904)619-6667

### **Initial receipt of Mat:**

- It is completely normal to see a slight opening or “smiling” at the seams when your mat is initially opened. To help your *Weatherking* mat settle from the shipping process, place it outside, face up, in direct sunlight until the mat lays flat. Keep the mat flat if possible, or loosely roll it face-in and transport to the desired location.

### **Transportation:**

- Keep your mat flat at all times if possible, even for transportation.
- If rolling cannot be avoided, ALWAYS loosely roll your mat face-up/logo side in. Rolling face-down/logo side out places unnecessary stress on seams and may cause damage. Rolling face out will void your mat’s warranty, which protects against any manufacturer defects for a year from purchase.
- NEVER place heavy objects on top of your mat when it is rolled for transport, this can place unnecessary stress on seams.
- Cellophane wrap is recommended to secure, DO NOT use adhesive tapes.

### **Cleaning:**

- Use any roller brush vacuum as frequently as needed.
- *Weatherking* mats are made from 100% solution dyed polypropylene, which makes them unharmed by many harsh chemicals and cleaners. With that said, ALWAYS test your cleaner on a small, inconspicuous section before use on large areas. Citrus based cleaners are recommended and ideal for removing chewing gum.
  - Our recommended spot cleaner: Folex Instant Carpet Spot Cleaner.
  - The product’s manufacturer suggests Simple Green.
- *Weatherking* mats may also be pressure washed from time to time and placed face up in direct sunlight to dry. Avoid placing pressure washer nozzle directly above.
